LARAVEL PRACTICAL

Scenario: Product List

You are building a small app to manage products in a store.

The admin should be able to:

1. **Add a Product**
2. **View all Products**
3. **Edit a Product**
4. **Delete a Product**

Each Product has:

- **Name** (text)
- **Price** (decimal)
- **Quantity** (number)
- **Category** (text)
